Today's weather and please take shelter

Temperatures reach up to 72 void degrees which is not that hot but the highest is 74 and the lowest is 61 also a warning for noon, you can get a heat stroke so people should go to the community pool.

Risusnec tempus

the chances of rain is 85%. and another warning, it can thunder and it only effects tall void residents because tall void residents are more likely to be struck by lighting, that's why most tall people are in hospital from storms.

Warning, get an umbrella that is made of rubber after 6 PM and also you might get a gust of low gravity wind and it lasts 2 hours and if you're not careful you can fly off to space. Unfortunately it happened to someone, and they luckily survived.
